

empowering Disaster Relief

more relief work
less paperwork

"These are indeed exciting times in the field of disaster-related donations management, and the Aidmatrix solution is the cornerstone of it."

*Greg Smith, Individual Assistance Donations Manager
California Office of Emergency Services*

The goal of the NDMN is to get more high-quality, unsolicited, donated goods quickly from the donor through the State to the VOAD who deliver them to those in need. All of our efforts are aligned with this mission. Aidmatrix supplies and manages the underlying technology required to do this, but the donation offers remain completely in the control of the State and their VOAD partners. Our role is to empower this humanitarian relief supply chain through partnership, best practices and technology.

Aidmatrix believes that by working together, we can make a bigger impact on the world than any of us could make alone. Our powerful technology serves as a hub that brings donors, nonprofits and governments together to get the right aid to people when and where they need it most.

National Donations Management Network (NDMN) Program

POWERED BY THE AIDMATRIX NETWORK®

The NDMN's disaster kit is full of tools, best practices and partners to empower those involved in the supply chain for humanitarian relief so they can help more people.

more relief work less paperwork

The National Donations Management Network is a national disaster relief coordination program funded by FEMA, The UPS Foundation, Accenture, and The Aidmatrix Foundation, Inc. to better manage unsolicited donations and volunteers. It connects State and local governments with donors, Voluntary Organizations Active in Disaster (VOAD) at State and national levels, and FEMA through web-based tools to reduce paperwork and allow for easy information sharing. No software, hardware or additional IT staff is required with this hosted solution, and training is minimal.

DISASTER KIT

- IN-KIND DONATIONS MANAGEMENT
- VOLUNTEER MANAGEMENT
- WAREHOUSE MANAGEMENT
- FINANCIAL DONATIONS REFERRAL

In-Kind Donations Management

Unsolicited donations are logged, tracked, viewed and shared by the State Donations Coordination Team which includes the VOAD community and State emergency managers.

Warehouse Management

Maintains real-time inventory tracking of the State's relief warehouse. Data is shared in whole or in part with the VOAD community and provides inventory views into multiple warehouses in a single screen.

Volunteer Management

Unsolicited volunteers are educated on how to get involved and are linked to the State's VOAD members that are accepting volunteer applications. Volunteer information is collected directly or integrated into an existing volunteer solution.

Financial Donations Referral

State VOAD members are listed on the portal and donors select the VOAD of their choice. States manage the VOAD list and the VOAD members process the donations directly.

Donors Make Offers to the State
Online donation tools are integrated into the State website where donors make unsolicited donations of goods and services. Easy-to-use call center tools help process phoned-in offers. Donors are treated with respect and efficiency.

State Emergency Offices Allocate Offers to the State VOADS
Donations management replaces pen and paper record keeping. Offers are quickly shared with VOAD members and processed once accepted. Administrative burdens are lessened, allowing valuable resources to focus on relief work.

VOAD Members Review, Accept and Receive Offers
VOAD members access, accept and process donations online, 24x7. Real-time inventory tracking, sorting and distribution tools enable goods to move in and out quickly. Offers and needs are easily communicated and matched. The result: More relief is delivered to more people in need.

WE'VE PARTNERED WITH COMMUNITIES OF ALL TYPES AND SIZES. WE CAN HELP.
